Format Options

Internal Version

This short version is most appropriate for internal recipients.

External Version

This long version is most appropriate for external recipients.

Sub-Identity Version

As above with additional Sub-Identity logotype placed below the UBC Full Signature after two full returns.

Email Programs

Outlook 2007 and 2010
Mac Mail
Webmail
Gmail
Thunderbird
Entourage

Size Options

The text shown here is set in 9pt. On higher resolution monitors and across some email platforms, this size of text may appear to be too small. The text size can be adjusted to three standard sizes: 9pt/10pt/11pt ✳

- 1 **Name**
Arial Black
 - 2 **Contact Grid**
Arial Regular
 - 3 **Address**
Arial Regular
Add two spaces between
Province and Country
 - 4 **Hyperlinks for Websites and Email**
Arial Regular
In most email programs these items will hyperlink if a hard return is entered after typing the information. In order to retain your formatting, do this “on the side” in your signature workspace and then paste it in. Remember to test your hyperlinks. *This step requires careful attention in selecting only the characters/spaces that require the hyperlink attribute.*
 - 5 **UBC Full Signature**
.png image file (40 px by 235 px)
 - 6 **Sub-Identity Logo**
.png image file (sized at similar visual weight to the UBC Full Signature)
- RGB Colour Options**
Electronic Signatures are available in UBC Blue (R=0 G=48 B=94), UBC Grey (R=47 G=93 B=124) and Black.
- One colour choice is to be used for **ALL** text and image elements in each UBC Email signature. Choose one of the colour options per set of both internal and external email signatures.

✳ Important Note on Resizing

When resizing the email signature to be either 9pt, 10pt or 11pt, be sure to select **ALL** of the elements (text and UBC Full Signature) in order to scale the entire unit proportionally.
